

Formatting Guide (Wikitext)

Quick reference for common Wikitext formatting used on the RT3 Wiki.

Tip:
Always click "Show preview"
before saving!

What it does	Wikitext code	Example / Result	Notes
Bold	<code>'''Bold Text'''</code>	Bold Text	Makes text bold.
Italic	<code>''Italic Text''</code>	<i>Italic Text</i>	Makes text italic.
Bold + Italic	<code>''''''<i>Bold Italic</i>''''''</code>	<i>Bold Italic</i>	Makes text bold and italic.
Internal link	<code>[[Build Mode]]</code>	Build Mode	Links to another wiki page.
Internal link (custom text)	<code>[[Build Mode Building Guide]]</code>	Building Guide	Links with custom text.
External link	<code>[https://rt3.ugwiki.org RT3 Wiki]</code>	RT3 Wiki 	Links to an external website.
Image	<code>[[File:Example.png thumb Example image]]</code>	 Example image	Displays an image with optional caption.
Heading	<code>== Heading ==</code>	Heading	Creates a section heading.
Horizontal line	<code>----</code>		Adds a horizontal line.
Comment (doesn't show)	<code><!-- This is a comment --></code>	<i>(not visible)</i>	Useful for notes or hiding things.
Redirect	<code>#REDIRECT [[Build Mode]]</code>	<i>(redirects to Build Mode)</i>	Redirects to another page.
Tabber (tabs)	<pre><tabber> Tab 1= Content for the first tab. - Tab 2= Content for the second tab. </tabber></pre>	Tab 1 Tab 2 Content for the first tab.	Creates tabs to organize content.
Roblox API (parser function)	<code>{{#robloxAPI: gameId 119048529960596 256x256 }}</code>		Gets data from Roblox using the built-in #robloxAPI function.

Extra notes

- Wikitext is case-sensitive.
- Preview your changes!
- Make sure to close all tags (like `<tabber>`).
- If something looks weird, check the wiki's [live pages](#) for examples.

Lists

Bulleted list

- * Item One
- * Item Two
- * Item Three

Numbered list

- # Item One
- # Item Two
- # Item Three

Nested list (example)

- * Main Item
 - ** Sub Item
 - *** Sub Sub Item

Table example

```
{| class="wikitable"
! Name !! Type
|-
| Burger || Food
|-
| Pizza || Food
|}
```

Name	Type
Burger	Food
Pizza	Food

Roblox API examples

The `#robloxAPI` parser function lets you pull data from Roblox.

Game icon (by Place ID)

`{{#robloxAPI: gameId | 119048529960596 | 256x256 }}`

Game visits

`{{#robloxAPI: visits | 119048529960596 }}`

1,234,567

Game creator

`{{#robloxAPI: creatorName | 119048529960596 }}`

Ultraw

More parser functions are available on the [Community Help Page](#).
